

Commercial Snow Clearing & Gritting Solutions

Landscape Design Contracts provides a snow clearance and gritting service throughout the Central Belt of Scotland. We offer a planned preventative or reactive service tailored to your requirements complete with a 24/7 emergency cover.

We help our blue chip clients provide safe sites for pedestrian and vehicle movement in times of inclement weather. As professional landscapers, we are mindful of the living landscape. We minimise plant mortality and infrastructure damage by accurately placing salt on site with specialist equipment. Our locally-based Field Teams work through the night supported by our Regional Contract Managers and professional office staff on night/day rotation.

To achieve our seamless delivery, our clients benefit from our subscription to a specialist weather forecaster with post code accuracy. We use this to forward plan; target delivery and help control limited budgets.

LDC has major contracts with blue chip retailers and property agents. We are fully insured and able to provide a quality service you can rely upon.

Landscape Design can provide a professional tailored maintenance solution for all elements of your landscaping needs. To receive more information and a detailed quotation please call David on 01506 639950.
